The 10th Japan-Korea-Taiwan Symposium on Strongly Correlated Electron Systems will be held in Himeji, Japan, from March 11 to March 13, 2010 [1]. The symposium, originally started as a workshop devoted to recent advances in the study of strongly correlated materials in order to cope with growing research activities in Korea and Japan, has now evolved into a trilateral Japan-Korea-Taiwan Symposium [2]. Particularly in 2010, the symposium will be combined with the 5th workshop on Complex Electron Systems, sponsored by RIKEN, Japan. The purpose is to provide a forum for discussion on the latest progress on a broad range of topics in strongly correlated materials.
